Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their sign of illness are the same as yours.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet.
- The full name of this medicine is Lymecycline 408mg Capsules, hard but within the leaflet it will be referred to as Lymecycline capsules.

What is in this leaflet

1. What Lymecycline capsules are and what they are used for
2. What you need to know before you take
3. How to take
4. Possible side effects
5. How to store
6. Contents of the pack and other information

1. What Lymecycline capsules are and what they are used for

Lymecycline capsules belong to a group of medicines called tetracycline antibiotics. It is used to treat acne, which appears as blackheads and whiteheads which people often refer to as pimples or spots. This medicine can also be used to treat other infections such as
- Acute sinusitis
- Bronchitis
- Infections in the abdomen
- Some types of eye infections called trachoma
- Soft tissue infections.

2. What you need to know before you take

Do not take Lymecycline capsules if you:
- are allergic to lymecycline, any other tetracyclines or any of the other ingredients of this medicine (listed in section 6)
- have ever had kidney disease
- are a child under the age of 12 years
- are pregnant or breastfeeding.

Warnings and precautions

Talk to your doctor or pharmacist before taking Lymecycline capsules if you:
- have had liver problems
- have had kidney problems
- suffer from systemic lupus erythematosus (an allergic condition that causes joint pain, skin rashes or fever)
- suffer from Myasthenia Gravis (a disease that weakens the muscles).

You should avoid direct exposure to sunlight or artificial sunlight from sunbeds. If you experience skin discomfort then stop taking this medicine and seek advice from your doctor.

Lymecycline capsules is not recommended for use in children under 12 years of age as it can cause permanent discolouration of tooth enamel and affect bone development.

Other medicines and Lymecycline capsules

Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines.

Do not take the following medicines at the same time as Lymecycline capsules, take them at least two hours before Lymecycline capsules or two hours after:
- indigestion remedies
- ulcer healing drugs
- quinapril (for high blood pressure)
- supplements containing calcium, aluminium, magnesium, zinc or iron.

Tell your doctor if you are taking any of the following:
- oral retinoids (to treat acne)
- anticoagulants (to stop the blood clotting)
- diuretics (used to treat kidney disease, heart disease or high blood pressure)
- oral contraceptives (the pill). Lymecycline capsules may make the oral contraceptive pill less effective. You should use additional contraceptive precautions whilst taking Lymecycline capsules.
- medicines for epilepsy including barbiturates e.g. phenobarbitone, phenytoin and carbamazepine
- methotrexate (an immunosuppressant).

Lymecycline capsules with food and drink

Absorption of Lymecycline capsules is not affected by moderate amounts of milk (e.g. a glass).

Lymecycline capsules should always be taken with a glass of water.

Pregnancy and breast-feeding

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

Lymecycline capsules must not be taken if you are pregnant or breast feeding.

Use of medicines such as Lymecycline capsules may affect the proper growth of developing teeth and lead to permanent discoloration.

Driving and using machines

No studies on the effects on the ability to drive and use machines have been performed.

3. How to take

Always take this medicine exactly as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are not sure.

The normal dose is one Lymecycline capsule once a day, preferably in the morning.

The dose will depend on how quickly your condition improves. For acne, this will normally be at least 8 weeks.

New formulations with improved absorption:

Lymecycline capsules are also used to treat:
- Acne
- Infections
- Other conditions such as
  - Soft tissue infections.
  - Acne
  - Infections in the abdomen
  - Some types of eye infections called trachoma
  - Soft tissue infections.

Lymecycline capsules should always be taken with a glass of water.

Pregnancy and breast-feeding

Driving and using machines

No studies on the effects on the ability to drive and use machines have been performed.
Infections
For other infections, the usual dosage is one Lymecycline capsule twice a day. Your doctor may recommend a lower or higher dose depending on the severity and type of infection. Ask your doctor if you are unsure. Lymecycline capsules should always be taken with a glass of water.

Children under 12 years
Lymecycline capsules is not recommended for use in children under 12 years of age as it can cause permanent discoloration of tooth enamel and affect bone development.

If you take more Lymecycline capsules than you should
If you (or someone else) take too many capsules, or you think a child may have swallowed any contact your nearest hospital casualty department or tell your doctor immediately.

If you forget to take Lymecycline capsules
Do not take a double dose to make up for a forgotten dose. If you forget to take a dose take it as soon as you remember it and then take the next dose at the right time.

If you stop taking Lymecycline capsules
Acne responds slowly to antibiotics. It is important that you take all the Lymecycline capsules that your doctor has prescribed for you. If you stop taking Lymecycline capsules too soon, your acne or infection could get worse or come back.

If you have any further questions on the use of this medicine, ask your doctor or pharmacist.

Possible side effects
Like all medicines, this medicine can cause side effects, although not everybody gets them.

If you experience any of the following serious side effects, stop taking your capsules and tell your doctor immediately or go to the nearest hospital accident and emergency department.
